

# AI Document Q&A - Sample Document

This is a sample document used by the end-to-end test suite.

The AI Document Q&A system can upload PDFs, extract their text, chunk it, and answer questions using retrieval-augmented generation.

Key fact for testing: the fastest land animal is the cheetah.

Another key fact: the capital of France is Paris.

If the RAG pipeline works, asking 'What is the capital of France?' should retrieve the chunk mentioning Paris and include it in the answer.
